

MALCOLM TINASHE USHE

CLASS 1 JOURNEYMAN FITTER & TURNER / MAINTENANCE FITTER

30 Musasa Street, Mufakose, Harare, Zimbabwe | +263774679828 | malcolmushe@gmail.com | linkedin.com/in/Malcolm ushe-b074b9168

PROFESSIONAL PROFILE

Apprentice-trained, Class 1 Journeyman Fitter and Turner with over 5 years of verified experience performing mechanical, hydraulic, and pneumatic plant maintenance across heavy manufacturing and flexible plastics environments. Hands-on specialist in executing preventative maintenance programs, managing floor job cards, fabricating critical spares, and conducting complex machine installations. Proven track record troubleshooting automated production systems under pressure, minimizing downtime during emergency after-hours call-outs, and ensuring high equipment reliability for continuous shift operations.

TECHNICAL COMPETENCIES & EXPERTISE

Fluid Power: Hydraulic circuit diagnosis, overhaul of directional control valves, seals, and pneumatic actuator/solenoid servicing.	Machining & Fabrication: Full proficiency in conventional pumps, lathes and vertical milling machine operations, gear cutting, and custom component welding.
Maintenance Systems: Preventative & Predictive maintenance planning, lubrication schedules, machine and plant condition monitoring.	Operations Control: Tracking job cards, optimizing spare parts requisitions, executing Root Cause Analysis (RCA), overhauls, and minimizing comeback jobs.
Technical Rigging & Setup: Comprehensive plant layout alignment, pipe networks, and mechanical commissioning.	Safety & Compliance: Expert execution of Hazardous Risk execution, Assessment documents, ISO 9001:2015 frameworks, and diagnostic strict Lock-Out/Tag-Out protocols.

PROFESSIONAL EXPERIENCE

Fitter and Turner

DripTech Irrigation – Pipe and Tank Factory • Harare, Zimbabwe	<i>February 2024 – Present</i>
- Maintain high-speed plant machinery producing U-PVC, M-PVC, HDPE, Borehole casing, sewer pipes, and LDPE profiles for agricultural and industrial usage. - Collaborated with teams of local and international technicians on key structural plant installation projects including the 2024 PVC 3 Installation, 2024 Loyalty 650, and 2024 Demark 250T plant relocations. - Executed precise engineering duties covering blueprint reading, marking machine grid positions, structural alignment, leveling, layout of water-cooling lines, and pneumatic distribution networks. - Conducted formal test running and diagnostic monitoring on newly commissioned production blocks to assure immediate operational performance.	

Maintenance Fitter

NatPak Flexibles Division • Harare, Zimbabwe	<i>January 2020 – February 2024</i>
- Conducted full day-to-day corrective and preventative maintenance tasks on a diverse fleet of specialized processing machines (extruders, flexo printers, bag makers, slitters, lamination lines, chillers, and cooling towers). - Followed scheduled structural plant planning configurations to ensure line availability and maximize target manufacturing efficiency. - Repaired, systematically calibrated, and overhauling heavy industrial components including complex gearboxes, pumps, and pneumatic systems. - Completed and managed administrative work structures such as compliance checklists, formal maintenance job cards, essential spares requisitions, and hazardous risk assessment sheets. - Executed daily tracking inspections on continuous-run compressed air networks and water-cooling utility packs to defend against shift downtime. - Machined custom replacement components (shafts, pinions, bushes, couplings, pulleys) inside the toolroom using manual lathes and mills to cut down resource dependence. - Directed machine structural modifications, floor movements, and decommissionings according to rigid engineering specifications.	

KEY INSTALLATION & COMMISSIONING PROJECTS

- Preform Mold Machine Installation (2020)
- Mono Extruder Installations (2021)
- Laminator Installation (2022)
- Water Softening System (2023)
- Slitter 5 Installation (2023)
- Lamination Relocation (2023)
- PVC 3 Extrusion Line Installation (2024)
- Loyalty 650 Plant Installation (2024)
- Demark 250T Plant Relocation (2024)
- Comexi Printing Press Installation (2024)

EDUCATION & CERTIFICATIONS

Class 1 Journeyman Trade Test Certificate in Fitter & Turner

- Apprenticeship Trained (2022 / 2023)

National Certificate in Machine Shop Engineering

- Bulawayo Polytechnic, Zimbabwe
- (Awarded Best Course Work Marks) (2022)

Hydraulic and Pneumatic Systems Certification

- Scientific and Industrial Research and Development Centre
- (SIRDC) (Training Record)

Root Cause Analysis Training / ISO 9001:2015 Quality Management

- Standards Association of Zimbabwe (SAZ) (2025)

GCE Advanced Level ("A" Level)

- Mzilikazi High School, Bulawayo (2008)

GCE Ordinary Level ("O" Level)

- Gifford High School, Bulawayo
- (9 Passes including Mathematics and English) (2006)
